

ISHFAQ AHMAD BHAT

Software Engineer | AI/GenAI | Backend

Tral, Kashmir | 8493929303 | ishfaqnazir24@gmail.com | linkedin.com/in/ishfaq24 | github.com/ishfaq24

PROFESSIONAL SUMMARY

Software engineer with production experience translating ambiguous business requirements into deployed applications, RESTful APIs, and workflow-automation tools, adding AI/LLM capabilities where they solve a real problem. Comfortable working inside existing codebases and infrastructure — integrating new features into live client systems rather than only building greenfield projects. Full-stack fluency across the MERN stack and Python (FastAPI), with a track record of writing efficient, testable, and maintainable code validated across multiple hackathon wins. B.Tech in Computer Science Engineering (CGPA 9.2), expected December 2026, while working full-time in a production engineering role.

TECHNICAL SKILLS

Core: Python | TypeScript / JavaScript | SQL | REST APIs | GraphQL | PostgreSQL | MongoDB | Docker | Git

AI / GenAI: LLMs | RAG Pipelines | LangChain | OpenAI API | Gemini API | Prompt Engineering

Frameworks: React.js, Node.js, Express.js, FastAPI, keras, Scikit-learn, Tailwind CSS

Also: C++, Java, Firebase Firestore, Supabase, OpenCV, Postman, Vercel, Render, Cloudinary

EXPERIENCE

AI Solutions Engineer — Vipthra Technologies

Full-time

May 2026 – Present

- Work directly with cross-functional product and engineering teams to translate ambiguous business requirements into production AI workflows, embedding GenAI features into existing client web applications and backend systems rather than building in isolation.
- Design and build production-ready GenAI applications — chatbots, document-analysis tools, and workflow-automation systems — using LLMs (OpenAI, Gemini), LangChain, and Python backends, prioritizing scalability, latency, and maintainability.
- Own prompt design and evaluation for client-facing AI features, iterating on accuracy and response quality based on real usage feedback from stakeholders.

Full-Stack Developer — NexGen Developers

Part-time

Sep 2025 – Present

- Design and develop scalable RESTful APIs powering high-performance web applications, focusing on efficient data exchange and clean service boundaries.
- Integrate frontend applications with backend services end-to-end, enforcing secure authentication, input validation, and consistent API contracts.
- Implement unit testing and structured debugging workflows, improving release reliability and reducing regressions in shipped features.

PROJECTS

Awaaz Kashmir — React.js, Node.js, Express.js, MongoDB, Leaflet, Gemini AI

- Built an AI-powered civic issue reporting platform that lets citizens report, verify, and track public infrastructure issues in real time, using Gemini for automated image analysis and complaint generation.
- Integrated geolocation mapping and intelligent department routing, plus an interactive dashboard with real-time notifications, analytics, and role-based access.

LoanSense AI — Intelligent Loan Approval — React.js, FastAPI, Python, Scikit-learn, SHAP

- Built an AI-powered loan approval system predicting eligibility via ML models, with SHAP-based explanations, confidence scores, and risk analysis for transparent, explainable lending decisions.
- Developed a responsive React frontend and FastAPI backend delivering real-time predictions with a seamless user experience.

MindVault — AI Personal Knowledge OS — React, Apollo/GraphQL, PostgreSQL, pgvector

- Designed the PostgreSQL schema and GraphQL contract for a personal knowledge-management platform, writing the SQL and relational constraints behind pgvector-based semantic search over stored notes and documents.

EDUCATION

Bachelor of Technology, Computer Science and Engineering

Expected Dec 2026

Government College of Engineering and Technology (GCET), Ganderbal, Kashmir | CGPA: 9.2

CERTIFICATIONS & HONORS

MERN Stack Developer — EduPi School | Fundamentals of Deep Learning — NVIDIA

Winner: AI Buildathon (GDG Anantnag) · GCET Kashmir Hackathon 2025 · Front-End Frenzy Hackathon 2024 · High School Hackathon at MLH 2023
